OVERVIEW

This assembly guide details installation of the Anti-theft Bolt Kit, compatible with both the G1 and G2 Gocycle. If you have any questions, or require any further assistance, please contact techsupport@gocycle.com.

PARTS LIST

To successfully complete the procedure you will require the following parts:

<table>
<thead>
<tr>
<th>Part Code</th>
<th>Part Description</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4075 Security Torx driver</td>
<td>1</td>
</tr>
<tr>
<td>B</td>
<td>4076 M4x10 BH S/S A2 TX 20 Security</td>
<td>6</td>
</tr>
</tbody>
</table>

TOOL LIST

To successfully complete this procedure you will require the following tools. You can purchase special KKL tools by their tool number detailed below.

<table>
<thead>
<tr>
<th>Part Code</th>
<th>Tool Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>4075</td>
<td>Security Torx driver</td>
</tr>
</tbody>
</table>
1. **ASSEMBLY**

1.1. Ensure the PitstopWheel is correctly attached to the Gocycle with all three cam levers firmly closed.

1.2. Locate the three threaded holes (as shown) next to the red rubber grommets on the PitstopWheel.

*(Note: The front and rear PitstopWheels are the same).*

1.2. Install one security bolt (B) into one of the threaded holes using the supplied tool (A). Tighten until the bolt rests flush against the stud hub cap.
1.3. Repeat for the remaining two holes on the front PitstopWheel.

The operation is the same for front and rear PitstopWheel. Repeat the above steps for the rear to complete the assembly.

Tip: Put your security tool in a safe place and avoid losing it. Avoid leaving your Gocycle outside overnight, or in a place where there is a high risk of theft.

**IMPORTANT NOTE:** THE ABOVE ASSEMBLY STEPS MUST BE CARRIED OUT IN ORDER. FAILING TO DO SO MAY RESULT IN DAMAGE TO THE GOCYCLE.
